# ADVANCES IN NONLINEAR ANALYSIS

*Editors-in-Chief: Vicentiu Radulescu, Romania; Marco Squassina, Italy*

## Aims and Scope

The journal aims to publish very selected research contributions devoted to nonlinear problems coming from different areas, with particular reference to those introducing new techniques capable of solving a wide range of problems. It especially welcomes contributions dealing with:

- calculus of variations and PDEs
- variational and topological methods for ODEs and PDEs
- non-smooth analysis and optimization
- generalized differentiability
- set-valued functions
- bifurcation theory
- convex analysis
- variational inequalities

## Call for Papers

The editors would like to invite submissions for this new journal. The decision on the acceptance is taken after a peer-reviewing procedure.
