

Table des matières

Introduction	i
--------------------	---

Première partie

[1] A bifurcation problem associated to a convex, asymptotically linear function ...	1
[2] The study of a bifurcation problem associated to an asymptotically linear function	8

Deuxième partie

[3] Periodic solutions of the equation $-\Delta v = v(1 - v ^2)$ in \mathbf{R} and \mathbf{R}^2	31
[4] On the Ginzburg-Landau energy with weight	49
[5] On the Ginzburg-Landau energy with weight	56
[6] Asymptotics for the minimizers of the Ginzburg-Landau energy with vanishing weight	69
[7] Minimizations problems and corresponding renormalized energies	83
[8] The renormalized energy associated to a harmonic map	100
